SETTING UP PAXTON

PAXTON

Plug the PAXTON unit into the mains power wall socket. The PAXTON will power on automatically, the Indicator light LED will be flashing and the night light will be on for 15 seconds.

Then, the night light will be turned off if there is no motion detected.

Smart Phone

Install the “Sensor” APP on your Android Device, which can be found by scanning the QR code below.

NOTE: the “Sensor” APP support only Android Device with Android 4.3 or above, If your device has system lower than that, please update it to Android 4.4.2 or above.

SETTING UP PAXTON

Smartphone

Turn on Bluetooth on your smart phone and open the APP.

The APP will connect to the PAXTON automatically, if the PAXTON is on and within the working range.

After successfully connected, the Indicator light LED on the PAXTON will be steady on.

(If the Bluetooth function of mobile phone is not activated, the APP will request to enable the Bluetooth.

Please select "YES" to activate the Bluetooth on smartphone.)

In the APP Main Menu, there is a ring whose color indicates the current status of PAXTON:

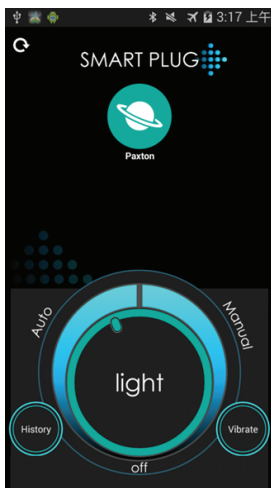

- Red : No PAXTON is connected
- Green : The PAXTON is connected and ready to work
- Orange : There is motion detected and the night light of the PAXTON is on.
(Only available in "Auto" mode)

APP CONTROL

Mode

1. Auto – slide the button to the “Auto” section, the night light will automatically turn on, for 15 seconds, when PAXTON detects movement.
2. Manual – user can turn on the night light by sliding the button on the ring to “Manual” section.
3. Off – the night light will be always off even motion detected.
i.e. motion detector is still active.

User can adjust brightness level by sliding the button on the ring within the Auto and Manual section. The night light brightness will be correspondent to the brightness of the blue color ring.

APP CONTROL

You can tap on “Vibrate” button to toggle between Vibrate/Sound/Silent.

You can tap on the “History” button in the APP to review the event log of the night light.

In Auto mode, the PAXTON will turn on the night light while motion is detected.

A status bar notification and vibrate/sound alert will be sent to smart phone at the same time.

APP CONTROL

In Auto mode, the PAXTON will turn on the night light while motion is detected. A status bar notification and vibrate/sound alert will be sent to smartphone at the same time.
